# Dunkin Donuts Center Executive Suite Level Project Overview

## Project Highlights:

The Dunkin' Donuts Center, New England's premier multi-use entertainment arena, was looking to renovate some of their older arena areas. This project included the updating of their 20 Executive suites. Durability played a major role in the design and selection of products, especially carpet, for this project. The arena gets a lot of visitors so it was extremely important to select and design a carpet that would withstand all the traffic. JS Interiors and Team Ruggieri worked together to create an overall design meant to be fun and playful. Door drops were designed to give a clear designation into each suite using **J&J Commercial**, as well as, inside each suite. Lobby areas were installed with **Centiva Starnet High Performance vinyl wood planks** to withstand the heavy traffic and enhance warm setting. For base, adhesive and prep durability, products from **Burke, Johnsonite, Mapei** and **Ardex**, were chosen to be used for this project. Whether you are at the dunk for a sporting event or a show, you are there to have a great time and the flooring designs and product selections reflect that.

This is a 2016 Starnet Worldwide Commercial Flooring Design Award entry.
